

# REMOTE CONTROL

This remote provides a visual reminder for students to self-monitor behavior. The hope is that after they are used to feedback and pushing buttons on the remote, that they will need fewer verbal prompts from adults!

**Directions:** Have students cut out the remote and buttons and allow them to decorate and assemble it any way they want. Tape the remote to their desk and direct them to push various buttons as needed as you say something similar to the following:

**Rewind** - "Rewind! If you could redo that choice, what would you do?"

**Fast Forward** - "Let's fast-forward into the future. What happens if \_\_\_\_\_"

**Pause** - "Freeze!"

**Play** - "Push 'play.' Let's make your body go normal speed!"

**Record** - "Push 'record,' If \_\_\_\_\_ (preferred adult) saw you making that choice, what do you think they would do/say?"

**Applause** - "Push that applause button. You did a great job!"
